

## STATUS NOTE ON SEED PROCESSING PLANT OF THE STATE.

### Seed processing.

Seed lots received from the field are often at high moisture content and contain trash and other inert material, weed seeds, deteriorated and damaged seeds, off-size seeds, etc. Seed processing is necessary in order to dry the seeds to safe moisture level; remove or reduce to the extent possible the various undesirable materials like small seeds, broken and shriveled seeds, straw, chaff, leaves, twigs, stones, soil particles, weed seeds, other crop seeds, deteriorated or damaged seeds; uniform size grading and seed treatment to upgrade the over all seed quality. Hence, seed processing refers to all the steps necessary for preparation of harvested seed for marketing, namely handling, drying, preconditioning cleaning, size grading, treating and packaging, etc.

Seed processing is done by the seed processing plant. After establishment of a new seed processing plant, it has to be registered with OSSOPCA by depositing an amount of Rs 1000/- (Rupees one thousand only). A code number is given to each plant, by which a seed lot can be known in which plant it has been processed. Then at the start of each financial year, the processing plant has to be renewed by depositing Rs 500/- (Rupees five hundred only.) As OSSOPCA is the supervising authority of processing, the processing supervision is done by the Seed certification personnel. But due to shortage of staffs, at present the seed certification is currently being done in random supervision by the OSSCA personnel.

The un-processed seeds produced under various seed multiplication programme come first to the processing plant. After its processing, it is stored in the storage godown nearby the processing plant. Then samples are drawn from the seed lot and send it for germination and other test. After test result received from the seed testing laboratory, the certification tags are attached by OSSOPCA with the seed bags. These seed bags are now ready for use. Hence the production of tagged seeds largely depends upon the no of operational processing plants and its capacity.

At present, our State has got 115 numbers of operational seed processing plants. These processing plants are established either by the OSSC Ltd or by the departmental farms, OUAT, CRRI, NSC and private seed producing firms. The agency wise operational processing plants and its capacity are appended in Annexure-I.

At present, the OSSC has got 27 numbers of operational paddy processing plants with a capacity of 3,70,000 quintals of processing capacity and 4 numbers of Groundnut processing plant with a capacity of 70,000 quintals of processing capacity. The detail list is appended in Annexure-II.

Under various schemes, funds have been provided to OSSC Ltd. for establishment of new seed processing plants as well as for upgradation of existing processing plants. Under RKVY scheme, during the year 2007-08, an amount of Rs 180.80 lakh has been provided to OSSC for establishment of new seed processing plants at Bolangir, Paljhar (Boudh) and Dabugaon (Nawarangapur), the work of which are in progress. Similarly an amount of Rs 15 lakh has been provided to OSSC under the above scheme for establishment of new seed processing plant at Kuchinda (Sambalpur), the work of which are also in progress. Besides the above, an amount of Rs 194.80 lakh has been provided under RKVY scheme for purchase of 6 no of mobile Groundnut processing plants, out of which 1 no of machine, 6 no of trucks and 6 no of tractors have already been purchased. The detail list of funds allocated under RKVY, proposed processing plants and its status are appended at Annexure-III.

Apart from the above, funds have also been provided by Government of India to OSSC for establishment of new Seed processing plant, seed storage godown and upgradation of existing processing plants under the scheme "Development and Strengthening of Infrastructure Facilities for Production and Distribution of Quality Seeds". During the year 2007-08, an amount of Rs 120 lakh has been provided to OSSC for establishment of new seed processing plant with godown at Jharsuguda, Parlakhemundi (Gajapati), Jajanga (Kendrapada) and seed storage godown at Sakhigopal (Puri), Baripada (Mayurbhanja) and jeypore. The works are in progress. After completion of the above works under both the schemes, an additional processing capacity of 28 TPHS (1,40,000 quintals) can be made available with OSSC, which will increase its processing capacity from 3,70,000 quintals to 5,10,000 quintals.

Besides the above, an amount of Rs 212.24 lakh has also been provided by GOI to OSSC during the year 2009-10 under the above scheme for improvement of existing processing plant, which will further enhance its processing capacity. The detail list of such proposed processing plant and its status along with funds released under the scheme are appended at Annexure-IV.

Apart from seed processing plants of OSSC, the departmental farms have got 32 numbers of seed processing plants having processing capacity of 53TPH (2, 65,000 quintals capacity). The detail list is appended at Annexure-V.

Besides OSSC and departmental farms, private seed producing firms, CRRI, NSC and OUAT have got 52 numbers of operational seed processing plants having capacity of 4,80,000 quintals. The detail list of such plants is appended at Annexure-VI.

As the seed processing is done in a limited time period, sufficient numbers of seed processing plants are to be established. In this process new seed processing plants are to be established or existing plants are to be upgraded. The defuncts plants are also to be restored. The list of such plants is appended in Annexure-VII.

At present, OSSC is the major seed producing agency in the State. Hence its processing capacity needs to be increased. The OSSC should have at least one seed processing plant in each district. After establishment of new seed processing plants by utilizing funds sanctioned under various schemes, the OSSC still lacks processing plants in the districts like Nayagarh, Sonepur, Jajpur, Dhenkanal, Anugul and Kandhamal. Funds have also been sanctioned to OSSC under RKVY for establishment of seed storage godowns in different districts. (The list of proposed seed godown, funds released and status are appended at Annexure-VIII) After establishment of the above seed storage godowns, the processing plants attached to it should be upgraded or new plants be established.

Further, the Groundnut seed production by the OSSC inside the state is gaining momentum day by day. At present, OSSC has 4 numbers of Groundnut seed processing plants having capacity of 70000 quintals. As the Groundnut seed growers are interested to process their seeds in their door steps, the OSSC should purchase more no. of mobile processing plants for the districts like Baragarh, Deogarh, Jharsuguda, Sundergarh, Kalahandi, Nuapada, Dhenkanal, Anugul, Keonjhar, Ganjam, Nawarangapur and Bolangir. Under RKVY scheme, an amount of Rs 194.80 lakh have been released to OSSC for purchase of 6 numbers of mobile processing plants, out of which one number of mobile plant, 6 numbers of Trucks and 6 numbers of Tractors have been purchased till date. The OSSC should utilize the amount released under various schemes as mentioned above in time. Suitable proposals for establishment of new processing plants or upgradation of existing plants may also be submitted by OSSC as suggested above.

Annexure-I						
Agency wise operational seed processing plants of the State
